

# Sanjay Sathyarapu

## Full Stack Software Engineer

CA, USA | +1 (669)-588-7976 | sanjay@jobsmails.com | [LinkedIn](#) | [GitHub](#)

### SUMMARY

Full Stack Software Engineer with 4+ years of experience building and shipping production systems at Goldman Sachs, Tech Mahindra, and Hexaware. I work mostly with **Spring Boot**, **AWS**, and **Kubernetes** to build microservices that handle production traffic. Recently been diving into **LangChain** and **RAG pipelines** to help traders search through market data. Care about clean code, system performance, and building stuff people want to use.

### SKILLS

- **Core Languages:** JavaScript/TypeScript, Java (8,11,17,21), Python, Go, SQL, PL/SQL
- **Backend Frameworks & APIs:** Spring Boot, Spring Cloud, Spring MVC/Security/Data JPA, Node.js/Express, FastAPI, Django, Hibernate, RESTful APIs, GraphQL, CQRS
- **Frontend Development:** React.js, Next.js 15, Angular, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Vercel AI SDK, tRPC
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda, EKS), Azure (AKS, App Service), Docker, Kubernetes, Terraform, Istio Service Mesh
- **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab CI, ArgoCD, Maven, Gradle, Git, GitOps
- **Databases:** PostgreSQL 16, MySQL, Oracle, SQL Server, MongoDB, Redis, Cassandra, Snowflake
- **AI/ML & Observability:** LangChain, RAG Pipelines, OpenAI Embeddings, LLM Inference, Prometheus, Grafana
- **Testing:** JUnit, Jest, Selenium, Postman, JMeter
- **Development Tools:** IntelliJ IDEA, VS Code, Eclipse, Jupyter Notebook
- **Application Servers:** Apache Tomcat, Wildfly
- **Operating Systems:** Linux, Windows, macOS
- **Methodologies:** Agile, Scrum, Kanban, SDLC, Trunk-based Development

### EXPERIENCE

#### Full Stack Developer | Goldman Sachs | USA

Aug 2025 – Present

- Engineered **Spring Boot 3.x microservices** processing 150K+ daily transactions, reducing API latency by 20-25% through caching and query optimization
- Designed distributed systems using **Spring Cloud**, **Hibernate ORM**, and **CQRS** across 8-10 services, enabling zero-downtime deployments
- Integrated **LangChain** RAG pipelines with OpenAI embeddings into trading APIs using **PostgreSQL with pgvector** for vector storage, delivering 85% relevance semantic search over 10TB+ market data
- Contributed to **AWS EKS migration** reducing deployment times by 50% (from 2 hours to 1 hour), maintaining 99.9% uptime for 50K+ concurrent trading users
- Helped deploy multi-region **AWS EKS clusters** with **Istio service mesh**, auto-scaling 1-2K pods across fintech workloads with sub-2% failure rate
- Implemented **GitOps** with **ArgoCD + GitHub Actions** for LLM inference pipelines on **AWS Lambda/EKS**, reducing cold-start latency by 30-40%
- Rebuilt trading dashboard with **Next.js 15 + TypeScript**, improving load speed by 30% for global teams
- Created real-time LLM chat interfaces with **Vercel AI SDK + tRPC**, handling 2-3K concurrent sessions at sub-300ms streaming latency

#### Software Engineer | Tech Mahindra | India

Jan 2021 – Jul 2023

- Built **Node.js/Express APIs** serving 500K+ users, increasing throughput by 2x (500 to 1,000 RPS) with 99.9% uptime using **PostgreSQL**
- Orchestrated event-driven **FastAPI** services with **Kafka**, processing 2-3M daily events across 2-3 **Kubernetes clusters**
- Optimized **PostgreSQL** replicas reducing query latency by 40% (5K+TPS) with sharded **MongoDB/Redis** for caching
- Structured **Terraform IaC** across **Azure AKS**, reducing cloud spend by 20-25% (\$80-100K savings) for 30+ microservices
- Established observability stack (**Prometheus/Grafana**) on **Azure AKS**, enabling faster anomaly detection across 50+ services
- Automated **CI/CD pipelines** with **Jenkins + GitLab CI**, achieving zero-touch deployments across **20+ environments**
- Led **8-person Agile@Scale squads** delivering **25% more features per sprint**, reducing defects by **40%** through **trunk-based development**
- Mentored **5 junior developers** on **cloud-native patterns**, accelerating production readiness **3x faster** than company average

#### Software Engineer | Hexaware Technologies | India

Jan 2019 – Dec 2019

- Developed **Java Spring Boot REST APIs** for enterprise applications, handling 100-150K daily requests with 99.9% uptime across Oracle/SQL Server databases
- Automated **CI/CD pipelines** using **Jenkins** and **Maven**, reducing deployment cycles from 1 week to 2-3 days across 5-6 microservices
- Built responsive **Angular** frontend dashboards with HTML5/CSS3/Bootstrap, improving user satisfaction scores by 20% for 2-3K internal users
- Containerized applications with **Docker** for **AWS EC2** deployments, cutting infrastructure costs by 15%
- Collaborated in Agile Scrum teams using JIRA/Git, delivering multiple sprints with minimal defects through **JUnit** testing and code reviews
- Optimized **PL/SQL** stored procedures on Oracle databases, reducing query execution time by 30-40% for financial reporting systems processing 500K+ records

### EDUCATION

- **Master of Science in Software Engineering**  
San Jose State University, San Jose, CA, USA

May 2025
